

TP, TP/IP65 and TPP indoor thermostat

The on-off TP Indoor Thermostat allows setting of room temperature with an adjustment knob within the range 8...30°C; the on-off TPP thermostat with LCD display allows setting of the room temperature within the range from 8...35°C in a day/night mode. If the room temperature drops below the preset value, the thermostat generates an output signal that opens the valve and switches the fan on. If the indoor temperature exceeds the preset value, the thermostat will switch over and generate a signal to close the valve and switch off the fan. The thermostat can be used in both, closed loop and open air circulation.

Technical data of indoor thermostats

Type	TP	TP IP54	TP IP65	TPP
Supply voltage	24..250V AC	24..250V AC	24..250V AC	2 baterie 1,5V
Measurement range	8...+30°C	0...+40°C	8...+35°C	5...+35°C
Connector rated load	6(2)A	16(5)A	10(1,5)A	5(2)A
Protection level	IP30	IP54	IP65	IP30
